GENERATIVE AI AGENTS & DEVELOPMENT

AI professional with 2 years of experience building cutting-edge Generative and agentic AI solutions that bridge creative vision with real-world impact. Skilled in developing intelligent agents, solving complex technical challenges, and driving innovation from concept to deployment. Known for a collaborative mindset and a strong focus on delivering scalable, meaningful AI applications. Actively seeking opportunities within forward-thinking teams where I can push the boundaries of AI and grow as a key contributor to transformative technologies.

PROFESSIONAL EXPERIENCE

WNS - VURAM

(Part of Capgemini)

AI Developer (Solutions Consultant)

Aug 2024 - Present

ROLES AND RESPONSIBILITIES

Bank Reconciliation - Westpac Groups Australia (Client Project)

- Designed and implemented an AI-infused Bank Reconciliation solution for Westpac Group (Australia) using Python, combining rule-based logic with intelligent automation to streamline financial data matching and exception handling. Integrated with enterprise systems for high-volume transaction processing and audit-ready reporting.

AgentOps - Enterprise AI Operations Platform

- Engineered a comprehensive enterprise platform for managing production AI agents, unifying observability, continuous evaluation, and guardrails governance into a single control plane.
- Implemented multi-LLM judging workflows and automated Responsible AI checks to evaluate reasoning quality, prompt safety, and factual grounding.
- Architected a scalable relational data model supporting A/B testing, end-to-end execution traces, and real-time alerting for token costs and latency.

Process Mining - Code Interpreter Agent

- Developed and implemented a Code Interpreter Agent for Process Mining App and Dashboard accelerator using Langchain framework. Enables users to extract insights and information from Excel data through natural language queries powered by LLM integration.

Document Extraction IDP - AWS Bedrock

- Developed an automated serverless agent using AWS Lambda and S3 that classifies uploaded documents (invoices, contracts, forms) and extracts structured data using OCR, ML models, and template matching. Achieved 90%+ accuracy with event-driven processing pipeline handling thousands of documents per hour.

Multi-Agent Energy Management - Supervisor Agents

- Developed a comprehensive multi-agent architecture on AWS Cloud featuring specialized agents with integrated knowledge bases. Implemented serverless workflows using Lambda functions, OpenSearch for contextual search, and DynamoDB for real-time energy consumption and customer support data management.

TECHVOLT SOFTWARE PVT LTD

Data Science Intern
Aug 2023 - Oct 2023

ROLES AND RESPONSIBILITIES

- Conducted advanced data analysis using SQL, Python, and visualization tools (Power BI/Tableau) to uncover key trends and performance drivers. Delivered data-driven insights through dashboards and reports, enabling stakeholders to make informed business decisions and track KPIs effectively.

CERTIFICATIONS

GEN AI for Everyone - Deeplearnig.AI

SKILLS

- AWS (Lambda, S3, DynamoDB, OpenSearch)
- LangChain & AutoGen Frameworks
- Multi-Agent System Design
- Document Processing & OCR
- Machine Learning Integration
- Python Programming
- MCP
- Langraph

RESEARCH & WORKSHOPS

MIT - MADRAS INSTITUTE OF TECHNOLOGY
ARTIFICIAL INTELLIGENCE WORKSHOP
MAY 22,2022

HYPSTUMA
AEROMODELLING AND ROCKET PROPULSION
WORKSHOP
AUG 6- AUG 7,2022

EDUCATION

Bachelor of Technology Per - 85%
Major: Computer Science and Engineering
Crescent University
CEOA Matriculation School (12th) Per - 75%
Graduated in 2019.

LANGUAGES

- ENGLISH
- TAMIL
- HINDI
- URDU

KEY ACHIEVEMENTS

- Client Engagement Success
- Process Optimization
- Quality Assurance in Projects
- Delivered AI-driven automation solutions for global clients, improving approval rates by 15% and reducing processing time by 20%. Collaborated across teams to deploy scalable Bedrock-based agents, ensuring quality, compliance, and measurable business impact.
